

DARLINGS OF CHELSEA

SOFA FIT GUIDE

You've fallen in love with a Darlings Of Chelsea piece of furniture, now we ask you to check to ensure that the furniture you choose will actually fit into your home!

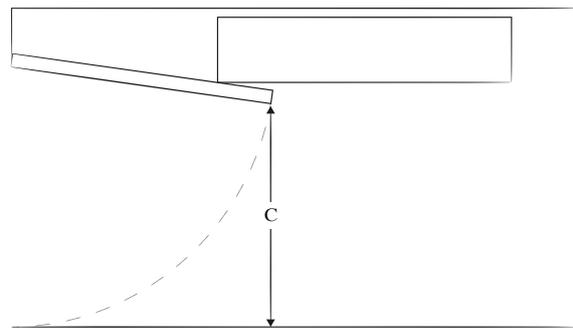

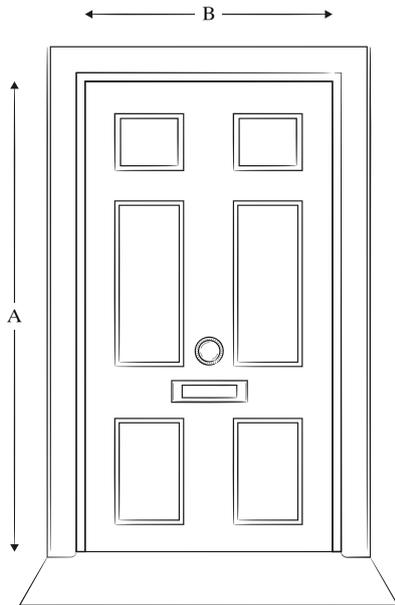

Our Darlings of Chelsea courier will do their best to complete the delivery on the day, however this guide will help before purchase to make sure the item fits into your perfectly chosen position. Do remember that this is just a guide and that our sofas/sofa beds can vary by approximately +/- 5%.

Remember to take into account any obstacles and fixtures. Check staircase headroom and turning space for beds and wardrobes being taken upstairs.

1 MEASURE THE ENTRANCE TO YOUR PROPERTY

MEASURING YOUR ENTRANCE

Measure the height (A) and width (B) of the doorways and any hall or passage. Measure the clearance from the wall facing you, as you enter the doorway of the room, to the wall of the hallway or adjoining room (C).

DIMENSION	MEASUREMENT (MM)
Height (A)	_____
Width (B)	_____
Clearance (C)	_____

NEED SOME HELP WITH YOUR MEASUREMENTS?

If you are still unsure, we may be able to offer an access check; there is a charge for this service.

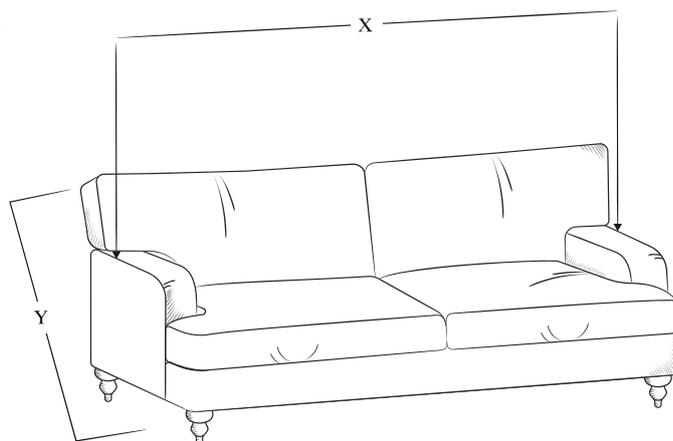

Give our friendly team a call on **01252 372 949**.

2 MEASURE THE FURNITURE YOU HAVE CHOSEN

MEASURING YOUR SOFA/SOFA BED

For a sofa/sofa bed, measure the width from arm to arm (X) and the diagonal depth (Y). For the diagonal depth, with cushions removed, place a straight edge against the most prominent parts of the back and arm. Then measure from that line to the rear corner of the sofa/sofa bed.

The diagonal depth (Y) must be less than the entry width (B). The sofa/sofa bed width (X) must be less than either the door height (B) or the entry clearance (C).

DIMENSION MEASUREMENT (MM)

Width (X) _____

Is X less than B or C?

Yes No

If you ticked yes for both measurement checks, your sofa/sofa bed will fit within your space.

Diagonal Depth (Y) _____

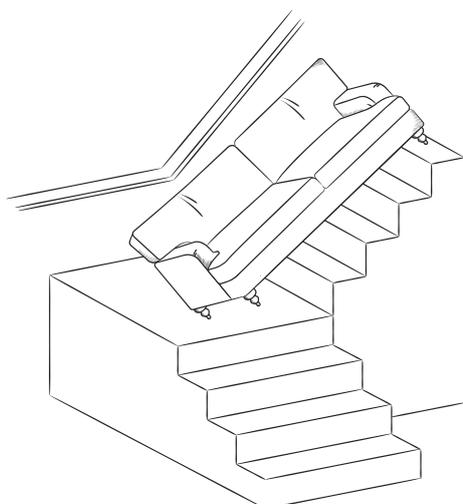

Is Y less than B?

Yes No

3 NAVIGATING YOUR FURNITURE

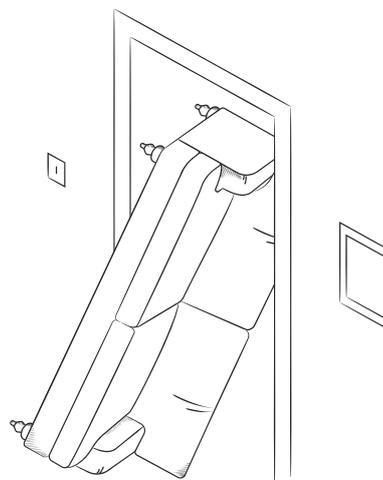

NAVIGATING STAIRS

If your sofa/sofa bed needs to go up some stairs, measure the width of the staircase at its narrowest point. Remember to take any handrails, light fixtures, low ceilings and any corners into account. If you have a bannister that our delivery team need to lift the sofa / sofa bed over make sure the distance between the bannister and the ceiling is greater than the depth of the sofa.

NAVIGATING NARROW ENTRANCES

If you have a very narrow doorway or your front door is too narrow, our delivery team will try to carry the sofa through upright. To check if this will be possible, you will need to measure the height of your doorway (C) to make sure it's greater than the sofa's packaged width (X). Remember to allow for some wiggle room for fingers and hands to help guide your product through.

DID YOU KNOW?

We offer removable arms on many of our sofa/sofa beds ranges which is a great option if you have a narrow entrance or some tricky access points. Visit our website to find out how much these will reduce each model by.
